SMOKE DETECTORS

Fire is the third leading cause of accidental death in the United States. Most fire deaths occur because the victims lose consciousness after inhaling smoke and poisonous fumes and thus are unable to escape. Many deaths can be avoided by the use of smoke detectors.

The Building Code requires the installation of smoke detectors in all newly constructed residential dwellings. Contact the Department of Community Development for more information, 562-8580.

Franklin Fire and Rescue strongly recommends that individual homeowners install smoke detectors for their own safety and that they are maintained in good working order. Detectors are inexpensive and easy to install. Homeowners should notify their fire insurance company that a detector has been installed as many give a discount for homes with approved alarm systems.

If you cannot afford a smoke detector or wish to obtain assistance with installing a smoke detector, call Franklin Fire and Rescue at 562-8581 for more information.
